

Biology for first years

Contents

1 Cells.....	3
2 Genetics.....	4
3 Evolution.....	5

1 Cells

[illegible]

2 Genetics

Genes are made of DNA. Every chromosome carries many genes, and genes are passed from parents to children.

2 Genetics

Genes are made of DNA. Every chromosome carries many genes, and genes are passed from parents to children.

2 Genetics

Genes are made of DNA. Every chromosome carries many genes, and genes are passed from parents to children.

2 Genetics

Genes are made of DNA. Every chromosome carries many genes, and genes are passed from parents to children.

3 Evolution

Natural selection means that living things best suited to their environment survive and have more offspring.

3 Evolution

Natural selection means that living things best suited to their environment survive and have more offspring.

3 Evolution

Natural selection means that living things best suited to their environment survive and have more offspring.

3 Evolution

Natural selection means that living things best suited to their environment survive and have more offspring.
